PROFESSIONAL EXPERIENCE

TREIBSTOFF EVOLUTION GMBH Mobile | Front-End Developer
Jan 2024 - May 2024 | Wiesbaden, Germany

GAEA21 Full Stack Developer & Team Leader
Jan 2021 – Jul 2021 | Switzerland

- Development of the mobile and web-based application 'The Green Index', which serves as a resource for green and organic products. It monitors and records CO2 emissions in the user profile using a pedometer system with CO2 calculations and geolocation. Additionally, it includes the implementation of a carpooling platform to reduce CO2 emissions, facilitates access to stores with eco-friendly products, and integrates a social network as well as a QR code scanner
- **Used Technologies:** Ionic, Symfony, LeafletJs, Github und MySQL.

TECHNIPACK | Web Developer
Mai 2020 – Aug 2020 | Ariana, TN

- Design and development of an e-commerce web and mobile application for a textile company.
- Full Technical/code support and demos until the production phase.
- Clean code and reusable for future enhancements.
- **Used Technologies:** Ionic, Laravel , Firebase, Github.

DEVTWEAKS | Web Developer
Feb 2018 – Jun 2018 | Djerba, TN

- Design and development of an e-commerce web application.
- The design was done using UML, and the development with Laravel.
- Full project deployment.
